

SPECIFICATIONS

Product Description: **BRACKETS**
Part Number: **4110-04 AND 4111 SERIES**
Style: **EBA AND DELUXE SCBA**

GENERAL DESCRIPTION:

Our EBA and Deluxe SCBA brackets are composed of a backplate, one spring clip (4110-04) or two spring clips (4111 series), a holding strap (4111 series) and a footplate. All parts are constructed from durable steel that has been coated by a thermoplastic material that helps prevent rusting and damage to SCBA cylinders.

CONSTRUCTION:

- All bracket components are made from durable coated steel.
- Brackets have a powder-coat finish. Clips are coated with a specially formulated thermoplastic material. The coating prevents the steel surfaces from rusting and prevents damage to cylinders.
- The special coating provides a slippery finish (easier to remove cylinder); is much harder (less tendency to crack or peel off) and is more suitable for use with composite, Kevlar or carbon cylinders.
- Hardened high cycle spring steel clips (4111 series) are multi-layer coated and have been tested to over 50,000 cycles (on and off an air cylinder). Completely non-abrasive to the coating or air cylinder.
- Clips are engineered with unique rounded ends providing a smooth bearing surface to prevent gouging or marring of cylinders.
- Holding strap (4111 series) is a 1" wide black nylon webbing fabric with buckle and retainer clip to help secure SCBA cylinders.

4110-04

4111 Series

DIMENSIONS:

4110-04 3" (7.6 cm) W X 14.5" (36.8 cm) H X 4.75" (12.1 cm) D, 1.75 lbs
4111 Series 4" (10.1 cm) W X 20.5" (52.1 cm) H X 4.125" (10.5 cm) D, 4.5 lbs

AVAILABLE:

EBA Bracket

4110-04 4 ¾" (12.0 cm) clip fits 5/10 minute EBA

Deluxe SCBA Bracket

4111-05 5 ¼" (13.3 cm) clip fits 30 minute, HP cylinder
4111-06 6 ¾" (17.1 cm) clip fits 30 minute, LP cylinder and 45 minute HP cylinder
4111-07 7 ¼" (18.4 cm) clip fits 60 minute, HP cylinder
